TA-29

Economics Paper-IX

(Economics of Developing Countries)

Time : 3 Hours]

[Max. Marks : 70

Instruction : All questions carry equal marks.

1. State the effects of over-population in developing countries and review their population-policy.

OR

1. Explain the strategy and the results of removing poverty in developing countries.
2. Discuss the results of industrialisation policy in developing countries.

OR

2. Explain the impact of land reforms on productivity and equity in developing countries.
3. Explain the role of foreign trade in the development. Suggest the proper trade policy for developing countries.

OR

3. What is import-substitution? Discuss its effects with reference to developing countries.
4. State the role of foreign-aid in economic development. Discuss the problems of foreign-aid in developing countries.

OR

4. Discuss the experiences of planning in developing countries.
5. Write notes on any **two** :
 - (1) The significant characteristics of developing countries.
 - (2) The nature of unemployment in developing countries.
 - (3) The tax-policy in developing countries.
 - (4) The role of state in the industrialisation.
 - (5) The problems of rural-urban migration.
