LL.M. (Intellectual Property Rights)

Objectives

“Knowledge is Power” – the adage is more relevant today than at any other time in the past; and it will be still more relevant in the years to come as we move more and more towards knowledge-based economy. It is but natural that in this new scenario, Intellectual Property Rights should occupy the central stage in the economic development.

A renewed awakening of the role of intellectual property in the countries of the various regions of the world has led more recently to the adoption or revision of national legislation on Intellectual Property Rights (IPR) as well as to the establishment or modernization of Government structures that administer such legislation.

The changing legal regime of IPR has become one of the crucial issues in the contemporary relations among nations. Central to such a concern has been the level of protection sought/contested on the rights at international and transnational level. The issues of IPR have acquired compelling width in the wake of IPRs agreement, with the WTO at its centre and monitored by WIPO.

The New IPR regime that has come into being seems to have a vital linkage with the revolution in New Generic Technologies (NGT), Information and Communication Technology (ICT) and Biotechnology in particular.

The present program has been designed keeping in view the above opportunities and challenges to give in-depth knowledge of IPR to the students pursuing LL.M. two year program. A part from the IPR the course has also taken care of the basic fundamentals of Law other than IPR to understand the legal system and its administration not only at the national but also international level.

To make the LL.M. program research oriented entire Semester IV has been devoted to towards practical oriented understanding of Law in general and IPR Law in particular.

The present program will cater the needs of the various stack holders of IPR such as Lawyers, Judges and Industry.
