BE Semester-____ (Branch Name) Question Bank

(Subject Name)

All questions carry equal marks(10 marks)

G.2 Enlist the types of progressive patient care & Explain the role & function of ICU in detail. Q.3 Explain the Intramural & Extramural Functions of hospital. Q.4 Discuss about factors affecting the number of nurses. Q.5 Enlist & Explain the problems commonly arise in OPDs. Q.6 Explain the skills of effective management. Q.7 Describe the Organizational tree of nursing with role of each nursing staff. Q.8 Enlist & Explain three equipments used in ICU priority wise. Justify your answer with appropriate reasons. Q.9 Describe the criteria for zoning of OT. Q.10 What precautions should be taken for protection against Radiation? Q.11 Briefly explain the function of CSS Department. Q.12 What are the benefits of forecasting? Also Explain the criteria for planning. Q.13 Explain the functions of blood bank. Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the systems used for biomedical waste management. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the instrumentation and functions of blood bank. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedica	Q.1	Explain the types & field of health services.
of ICU in detail. Q.3 Explain the Intramural & Extramural Functions of hospital. Q.4 Discuss about factors affecting the number of nurses. Q.5 Enlist & Explain the problems commonly arise in OPDs. Q.6 Explain the skills of effective management. Q.7 Describe the Organizational tree of nursing with role of each nursing staff. Q.8 Enlist & Explain three equipments used in ICU priority wise. Justify your answer with appropriate reasons. Q.9 Describe the criteria for zoning of OT. Q.10 What precautions should be taken for protection against Radiation? Q.11 Briefly explain the function of CSS Department. Q.12 What are the benefits of forecasting? Also Explain the criteria for planning. Q.13 Explain the functions of blood bank. Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospital. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Discuss the need of physiotherapy department and list		
 Q.3 Explain the Intramural & Extramural Functions of hospital. Q.4 Discuss about factors affecting the number of nurses. Q.5 Enlist & Explain the problems commonly arise in OPDs. Q.6 Explain the skills of effective management. Q.7 Describe the Organizational tree of nursing with role of each nursing staff. Q.8 Enlist & Explain three equipments used in ICU priority wise. Justify your answer with appropriate reasons. Q.9 Describe the criteria for zoning of OT. Q.10 What precautions should be taken for protection against Radiation? Q.11 Briefly explain the function of CSS Department. Q.12 What are the benefits of forecasting? Also Explain the criteria for planning. Q.13 Explain the functions of blood bank. Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the factors affecting number of nurses. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. List the various types of budgets and explain income expenditu	Q.2	
 Q.4 Discuss about factors affecting the number of nurses. Q.5 Enlist & Explain the problems commonly arise in OPDs. Q.6 Explain the skills of effective management. Q.7 Describe the Organizational tree of nursing with role of each nursing staff. Q.8 Enlist & Explain three equipments used in ICU priority wise. Justify your answer with appropriate reasons. Q.9 Describe the criteria for zoning of OT. Q.10 What precautions should be taken for protection against Radiation? Q.11 Briefly explain the function of CSS Department. Q.12 What are the benefits of forecasting? Also Explain the criteria for planning. Q.13 Explain the functions of blood bank. Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation	Q 3	
 Q.5 Enlist & Explain the problems commonly arise in OPDs. Q.6 Explain the skills of effective management. Q.7 Describe the Organizational tree of nursing with role of each nursing staff. Q.8 Enlist & Explain three equipments used in ICU priority wise. Justify your answer with appropriate reasons. Q.9 Describe the criteria for zoning of OT. Q.10 What precautions should be taken for protection against Radiation? Q.11 Briefly explain the function of CSS Department. Q.12 What are the benefits of forecasting? Also Explain the criteria for planning. Q.13 Explain the functions of blood bank. Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of bio		
 Q.6 Explain the skills of effective management. Q.7 Describe the Organizational tree of nursing with role of each nursing staff. Q.8 Enlist & Explain three equipments used in ICU priority wise. Justify your answer with appropriate reasons. Q.9 Describe the criteria for zoning of OT. Q.10 What precautions should be taken for protection against Radiation? Q.11 Briefly explain the function of CSS Department. Q.12 What are the benefits of forecasting? Also Explain the criteria for planning. Q.13 Explain the functions of blood bank. Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the feed of p		
 Q.7 Describe the Organizational tree of nursing with role of each nursing staff. Q.8 Enlist & Explain three equipments used in ICU priority wise. Justify your answer with appropriate reasons. Q.9 Describe the criteria for zoning of OT. Q.10 What precautions should be taken for protection against Radiation? Q.11 Briefly explain the function of CSS Department. Q.12 What are the benefits of forecasting? Also Explain the criteria for planning. Q.13 Explain the functions of blood bank. Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the various types of budgets and explain income expenditure statements. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the feed of physiotherapy department and list t		
staff. Q.8 Enlist & Explain three equipments used in ICU priority wise. Justify your answer with appropriate reasons. Q.9 Describe the criteria for zoning of OT. Q.10 What precautions should be taken for protection against Radiation? Q.11 Briefly explain the function of CSS Department. Q.12 What are the benefits of forecasting? Also Explain the criteria for planning. Q.13 Explain the functions of blood bank. Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Discuss the need of physiotherapy department and list the commonly arise problems in this department.		
answer with appropriate reasons. Q.9 Describe the criteria for zoning of OT. Q.10 What precautions should be taken for protection against Radiation? Q.11 Briefly explain the function of CSS Department. Q.12 What are the benefits of forecasting? Also Explain the criteria for planning. Q.13 Explain the functions of blood bank. Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department.	Q.1	
answer with appropriate reasons. Q.9 Describe the criteria for zoning of OT. Q.10 What precautions should be taken for protection against Radiation? Q.11 Briefly explain the function of CSS Department. Q.12 What are the benefits of forecasting? Also Explain the criteria for planning. Q.13 Explain the functions of blood bank. Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department.	Q.8	Enlist & Explain three equipments used in ICU priority wise. Justify your
 Q.9 Describe the criteria for zoning of OT. Q.10 What precautions should be taken for protection against Radiation? Q.11 Briefly explain the function of CSS Department. Q.12 What are the benefits of forecasting? Also Explain the criteria for planning. Q.13 Explain the functions of blood bank. Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 		
 Q.10 What precautions should be taken for protection against Radiation? Q.11 Briefly explain the function of CSS Department. Q.12 What are the benefits of forecasting? Also Explain the criteria for planning. Q.13 Explain the functions of blood bank. Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 	Q.9	
 Q.11 Briefly explain the function of CSS Department. Q.12 What are the benefits of forecasting? Also Explain the criteria for planning. Q.13 Explain the functions of blood bank. Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 	Q.10	
 Q.12 What are the benefits of forecasting? Also Explain the criteria for planning. Q.13 Explain the functions of blood bank. Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 	Q.11	
planning. Q.13 Explain the functions of blood bank. Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department.		
 Q.13 Explain the functions of blood bank. Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 		<u> </u>
 Q.14 Describe the various types of Budgets. Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 	Q.13	· •
 Q.15 Explain physiotherapy department of Hospital. Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 	Q.14	
 Q.16 Define Hospital Budget. Also Explain income & Expenditure Statements. Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 		
 Q.17 Explain the systems used for biomedical waste management. Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 	Q.16	
 Q.18 Explain the hierarchy of hospital administration. Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 	Q.17	
 Q.19 What are the important functions of biomedical engineering unit in hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 	Q.18	
hospital? Q.20 List and discuss the equipment and staff requires for medical intensive care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department.		
Care unit. Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department.		·
 Q.21 Discuss the objective and function of central sterilization and supply department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 	Q.20	List and discuss the equipment and staff requires for medical intensive
department. Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department.		care unit.
 Q.22 Explain the clinical facilities requires in emergency department. Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 	Q.21	Discuss the objective and function of central sterilization and supply
 Q.23 Based on objective and size, classify different types of hospitals. Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 		department.
 Q.24 List and explain various indices for measuring efficiency of hospital. Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 	Q.22	Explain the clinical facilities requires in emergency department.
 Q.25 Discuss the overview and functions of clinical laboratories. Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 	Q.23	Based on objective and size, classify different types of hospitals.
 Q.26 Discuss the factors affecting number of nurses. Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 	Q.24	List and explain various indices for measuring efficiency of hospital.
 Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 	Q.25	Discuss the overview and functions of clinical laboratories.
 Q.27 Enlist the common elements of outpatient facilities and space requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 	Q.26	Discuss the factors affecting number of nurses.
requirements. Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department.		
 Q.28 Discuss the forecasting and planning criteria in hospital management. Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 		· · · · · · · · · · · · · · · · · · ·
 Q.29 List the various types of budgets and explain income expenditure statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 	Q.28	
statements. Q.30 List the instrumentation and functions of blood bank. Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department.		
 Q.31 Explain the management of biomedical waste in hospital. Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department. 		statements.
Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department.	Q.30	List the instrumentation and functions of blood bank.
Q.32 Discuss the need of physiotherapy department and list the commonly arise problems in this department.	Q.31	Explain the management of biomedical waste in hospital.
arise problems in this department.	Q.32	
	Q.33	

Q.34	What are the cardinal rules for material management in hospital?
Q.35	Discuss Hospital Administrative Hierarchy.
Q.36	Explain typical Layout of a Hospital Shoving Various Departments.
Q.37	Discuss organization of Various Clinical Departments in hospitals.
Q.38	Explain need and organization Of Bio-Medical Engineering Department in hospitals.
Q.39	Discuss duties & Responsibilities Activity Planning Department.
Q.40	Explain need, requirement and layout of ICU.
Q.41	Explain need, requirement and layout of ICCU.
Q.42	Explain need, requirement and layout of PICU.
Q.43	Explain need, requirement and layout of NICU.
Q.44	Explain need, requirement and layout of Blood Bank.
Q.45	Explain need, requirement and layout of Physiotherapy Department.
Q.46	Explain need, requirement and layout of Bio-Medical Engineering
	Department.
Q.47	Discuss Cost Control & Financial Management of Hospital.
Q.48	Explain various methods for hospital Waste Management.
Q.49	What are the needs and requirements of Quality Management & Audit.
Q.50	Explain the Management Information System For Hospital.
